

Product information

Automatic Transmission Cleaner

PI 16/02/08/2016

Description

Automatic Transmission Cleaner is a highly effective cleaning fluid designed to dissolve disruptive deposits and residues in automatic transmissions in order to provide optimal shifting performance. This thus extends the transmission service life. These highly effective detergent and dispersant additives in association with the carrier fluid have been tested in the laboratory and in practical field trials for their ability to dissolve sludge and lacquer formers.

Properties

- no pollution to the environment
- simple to use
- does not attack common sealing materials
- assures optimum shifting performance
- rapid cleaning
- gentle cleaning
- highly economical

Technical data

Base	Additiv, Naphthenbasisches Spezialöl / additive, naphtha-base special oil
Viscosity index	204
Viscosity at 40 °C	58,0 mm ² /s
Viscosity at 100 °C	11,8 mm ² /s
Form	flüssig, liquid
Odor	charakteristisch / characteristic
Density at 15 °C	0,885 g/ml

Areas of application

Suitable for all automatic transmissions.

Application

Add contents of can to warmed up transmission oil before changing the automatic transmission fluid using a funnel and the dipstick. Allow engine to run in neutral for approx. 10 minutes and shift through all gears at least twice with the vehicle in a stationary position. Following the cleaning procedure, carry out an oil and filter change using the corresponding Liqui Moly transmission oil. The contents of one 300 ml can are sufficient for 6 to 9 liters of oil. Liqui Moly Automatic Transmission Cleaner also can be used in conjunction with all commercially available automatic transmission cleaner systems. Ensure that you observe the work instructions provided by the equipment manufacturer.

Available pack sizes

300 ml Can sheet metal	2512 D-GB-I-E-P
300 ml Can sheet metal	2700 GB-AUS
